## Green Port Open House October 1

The Port of Long Beach would like to invite you to its Green Port Open House on October 1, to see first hand how the Port helps the economy while protecting the environment. Join employees, environmental organizations and community groups as they showcase the Port of Long Beach's new environmental policy during a Green Port Open House from 9:00 a.m. to noon on Saturday, October 1, at the Port's Administration Building, 925 Harbor Plaza.

The Port of Long Beach is a leading economic engine for the local community, supporting 316,000 jobs in Southern California or one of every 22 jobs regionally. The Port is also concerned about the environment. At the Green Port Open House, the community can learn about the Port's groundbreaking Green Port Policy – a sweep-

ing new framework for how the Port will address environmental impacts and the very way it does business.

You can learn about the Port's leading edge environmental programs by taking a free harbor cruise, looking at the Port's clean-burning vehicles and equipment, and viewing demonstrations of clean air technology. Use high-tech instruments to identify polluted soil and water samples in mini-laboratories. Also, drop off your old electronics at the Ease-E-

Waste Recycling Station.

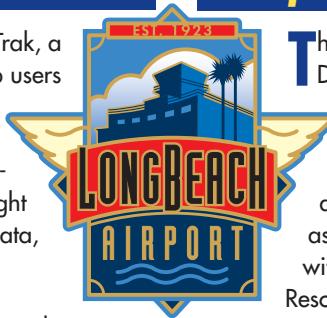

There will be entertainment, free food and activities for children. So bring the entire family to the Long Beach Green Port Open House! For more information, visit [www.polb.com](http://www.polb.com), or call 590.4121.

## The Long Beach Airport WebTrak

The Long Beach Airport is proud to introduce WebTrak, a new Internet flight tracking system that allows web users to monitor flight tracks in-and-out of Long Beach Airport, and within the greater Los Angeles and Orange County region. The system also provides aircraft identification details, including user name and flight number, flight origination and destination, noise data, and altitude levels.

Accessing WebTrak is quick and simple. Just log on to Airport's website at [www.lgb.org](http://www.lgb.org) and then click on the WebTrak link. You can also access WebTrak via the City's website at [www.longbeach.gov/Airport](http://www.longbeach.gov/Airport). First time users may need to download a free version of Adobe SVG Viewer.

The flight tracks are generated from actual raw aircraft radar data. However, for security reasons, there is an estimated ten-minute delay which is indicated by the date and time posted on the view screen. If you have any questions regarding WebTrak, please call 570.2678.

## Proposed Airport Terminal Area Improvements Project Draft EIR Update

The proposed Airport Terminal Area Improvements Project Draft EIR is due to be completed this fall and released for public review shortly thereafter. The City's consultant, who is preparing the Draft EIR, is completing the required technical studies including evaluations of air quality, noise, and traffic impacts as well as health risk assessments. The technical studies are being coordinated with regulatory agencies such as the AQMD and the Air Resources Board.

## Know What To Do In the Event of a Major Emergency

When the City of Long Beach Emergency Operations Center receives a state of emergency warning, a team of fire and police professionals will assess and monitor the situation before deciding on a course of action.

During any major regional emergency, residents and businesses are encouraged to stay tuned to TV and radio news stations such as KNX 1070 AM or KFWB 980 AM for updates.

If there is a significant event in Long Beach, information will be sent to all TV, radio and print media. You can also learn about information in the following ways:

- Listen to FM radio station KKJZ, 88.1.
- Read [www.longbeach.gov](http://www.longbeach.gov).
- Read [www.LBReport.com](http://www.LBReport.com).
- Watch LBTV, Charter Communications Channel 8.
- Charter Television will run Long Beach information in the lower third of all the channels on its cable system.
- Check your email. Messages will be sent to everyone who has signed up to receive any of the City's E-Notify messages. Visit [www.longbeach.gov/enotify](http://www.longbeach.gov/enotify), and choose which City information to receive.
- During an extended major emergency, updates in English, Spanish and Khmer can be heard on the City's Emergency Hotline, 570.5252.

If an action is necessary, the media will be informed immediately and repeatedly. Emergency response vehicles and helicopters will go directly to impacted neighborhoods and advise residents via microphones and door-to-door contact. Long Beach does not have bomb shelters or civil defense sirens.

**Two safe ways** to dispose of used motor oil and filters are each **one call away**:

### 1. RESIDENTIAL RECYCLING PROGRAM

**Used motor oil and filters are collected by request ONLY.** Call (800) RECYCL2 by 4 p.m. to request free collection containers, or to schedule an oil and filter pick up on your next recycling collection day. Place motor oil and filters two feet away from your recycling cart or bin (not inside them) and only if a pick up has been scheduled.

### 2. DROP-OFF COLLECTION CENTERS

If you do not receive City recycling service, call 570.2876 for a list of certified used oil recycling centers in Long Beach. Place used motor oil or filter into any sealed container and take it to one of the conveniently located centers. You'll receive 16¢ for each gallon of motor oil you recycle at these centers.

Funded by a grant from the California Integrated Waste Management Board.

This information is available in an alternate format by calling 570.6379.
